Tylynn Griffin, Owner  
Cold Springs Trout Farm  
2284 Fruitland Drive  
Ogden, UT 84414

Dear Ms. Griffin:

You recently submitted blood samples to certify the sterility of brown, brook, and rainbow trout at Cold Springs Trout Farm. The samples were sent to Washington State University with results reported by the laboratory on August 28, 2024. All lots submitted tested as greater than 95% triploid:

- Brown trout: 56/58 triploid, 0.966 triploidy
- Brook trout: 58/59 triploid, 0.983 triploidy
- Rainbow trout: 60/60 triploid, 1.00 triploidy

Therefore fish from all lots tested are considered triploid under Utah Division of Wildlife Resources' Administrative Rule R657-59A-5 and may be stocked into locations approved for triploid stocking. Please contact me at 435-790-2283 if you have any questions.

Sincerely,

Trina Hedrick  
Coldwater Sportfish Coordinator
